

Jasper Memorial Hospital Electronic Health Technology (\$93,009). I would ban earmarks as we know them, but as long as these earmarks are available, I'm going to apply for them in an effort to pursue federal funding opportunities for my district. For non-defense projects in the current earmarking system, I work closely with local governments, civic organizations, non-profits and business development authorities to identify and prioritize projects important to local communities in Georgia's Eighth Congressional District (and sometimes elsewhere). I only request funds for projects authorized by law for federal funding and do not do so for private parties or entities. This project will help the hospital purchase an electronic health record technology system to record and track every clinical task performed within the hospital. This project is a valuable use of taxpayer funds because it will reduce costs and enable physicians to more effectively manage patients' health needs. Beneficiary: Jasper Memorial Hospital, 898 College Street, Monticello, GA 31064.
